

Technology & Social Interaction - Weak Task 2

Sample Submission for IELTS Writing Evaluation

I think technology is bad for people. Because everyone is on phone all the time. My friend also do this. They don't talk to each other in real life. Social media is very bad. Facebook and Instagram make people sad. Lot of study show this. People can't make friend in real now. Technology make us alone. I agree that technology is bad and make people less social. Government should do something about this problem and stop it.
